Rouaix source-inspired jet mesh • exact central section

Native OpenFOAM cells at z = 0 m | domain x = 20 m × y = 10 m | x downstream, y upward | metres

Amber dashes: assumed source-inspired refinement corridor, extrapolated after x = 1.95 m. Nominal targets: 14 mm (L3), 56 mm (L1); inset Δx is measured on native z = 0 faces. No wall-layer extrusion is present in this cast-only mesh.
